

Special Issue Agro Sur Journal 2018

Agroecology and Sustainable Agricultural Systems

Our new Special Issue in “Agroecology and Sustainable Agricultural Systems” aims to highlight the relevance of using agroecological principles and practices to achieving sustainable agricultural systems under climate change conditions. For this reason, contributions related to the following topics are invited:

Sustainable management of soils
Conservation biological control
Social and educational perspectives in Agroecology
Agroecology and climate change resilient farming systems
Agroecological practices for sustainable food and livestock production

We welcome contributions in English as:

Research papers
Short communications
Points of view
Reviews

All submitted articles will be peer-reviewed.

The deadline for receiving manuscripts is August 15th 2018
For information and manuscript submissions
